The epicenter of New Zealand's blue economy

A location that is hard to beat

Nestled within the heart of New Zealand's maritime domain, our region serves as an epicenter for the blue economy. At its core is Port Nelson, the largest fishing port in Australasia, a nexus for a diverse array of blue economy activities that link our region to the farthest corners of the globe. With nearly 400 enterprises in this dynamic sector, we are undoubtedly a hub for ocean-based development.

Facilitating our global reach is the Nelson Airport, a vital gateway that orchestrates an impressive 300 weekly flights. This extensive network not only caters to the needs of our residents and businesses but also beckons tourists from around the world to partake in our region's wonders.

It takes just a mere ten-minute drive from the centre of Nelson city to reach the airport. Equally enticing is the fact that, within a leisurely 60 to 90-minute drive, you can find yourself immersed in one of our region's three enchanting National Parks or exploring over 300 world-class mountain biking trails. In essence, our location offers the best of both worlds – unparalleled connectivity when desired, and idyllic seclusion when craved.

*The centre of New Zealand,

DESTINATION

A hotspot for innovation and natural beauty

Nelson Tasman has long been a coveted destination, celebrated for its exceptional environment, central position, sun-kissed climate, and ideal growing conditions. Within our boundaries lies a microcosm of the entire nation, effortlessly bringing together the very essence of what makes New Zealand extraordinary, all easily accessible in one place.

Our history is a rich tapestry, woven through the migrations of Tangata Whenua and European settlers, evolving into a vibrant multicultural community that now proudly calls Nelson Tasman home.

The land and sea profoundly influence our way of life, shaping our regional economy. Our awe-inspiring natural landscapes draw visitors from across the globe, our fertile lands yield the most exceptional produce, and the embracing oceans that surround us position us as the natural epicenter of New Zealand's blue economy.

Our global connectivity is undeniable. From this central hub, we export our seafood, innovative products, and expertise to the farthest reaches of the planet. Anchored by our claim as New Zealand's geographical heart, our region one of the nation's busiest regional airports and is home to the largest fishing port in Australasia.

The kiwi spirit of innovation and pioneering excellence thrives here. Our region is a breeding ground for high achievers and visionary enterprises, attracting both native talent and those who seek the unique lifestyle we offer. As a place where creativity and innovation flourish, Nelson Tasman provides the space to explore, create, and push the boundaries of what's possible.

Our blue economy encompasses a diverse array of industries, spanning from deep-sea fishing and coastal aquaculture to cutting-edge seafood processing, engineering, pharmaceuticals and more. The sector is partnering with world-leading academic institutions and pioneering scientific research and development. From here in the South Pacific, we are propelling new industry segments, innovative products, and ground-breaking technologies on the global stage.

Why choose Nelson Tasman

Nelson Tasman is recognised for its solid economic foundation, built on well-established sectors that have contributed to our prosperity for generations. These enduring competitive advantages underpin our ongoing success.

BLUE ECONOMY EXCELLENCE

Te Taihu, the Top of the South, is the source for 70% of New Zealand's aquaculture, with major industry players like Talleys and Sealord operating out of Port Nelson. We are home to nearly 400 ocean related enterprises, reflected in the growing strength of our blue economy cluster – Moananui. Our region proudly houses world-leading institutions such as the Cawthron Institute and Plant and Food Research, dedicated to pioneering advancements in the blue economy.

FOOD, BEVERAGE, AND WELLNESS PRODUCTS

Nelson Tasman offers fertile ground for primary produce, but it's also an increasingly fertile ground for innovators who are revolutionizing our industries through science, innovation, and astute marketing. Our blue economy enterprises are at the forefront of creating pioneering products, ranging from mouth-watering microalgae to fish skin beauty products.

CUTTING-EDGE RESEARCH

With state-of-the-art blue economy facilities and capabilities, Nelson Tasman is a global leader in scientific research. Our region boasts the highest concentration of scientists per capita of any New Zealand city. Notable institutions like the Cawthron Institute, Plant & Food Aquaculture Centre, and Cawthron Aquaculture Park drive innovation, while advanced manufacturing from the likes of Snap Group and Kernohan Engineering contribute to our technological excellence. Sitting alongside this is R&D capability from national organisations like NIWA. The blue economy sector holds immense potential for further growth in research, development, innovation, and technology deployment, enhancing productivity across the region.

THRIVING VISITOR SECTOR

Nelson Tasman ranks among New Zealand's a growing tourism regions, with a long-standing tradition of attracting both international and domestic travellers. Our natural environment lies at the heart of our vibrant visitor economy, offering unique experiences that connect visitors to the ocean through our picturesque landscapes and tourism offerings.

*Choose Nelson Tasman
for a future where innovation,
economic prosperity, and
natural beauty converge to
create limitless opportunities.*

Living and thriving in Nelson Tasman

What once attracted visitors for holidays is now beckoning individuals seeking a life immersed in all that they adore.

AWARD-WINNING WEATHER

Nelson Tasman proudly enjoys chart-topping sunshine hours and mild winters that weave the very fabric of our lifestyle. Here, you can confidently plan Saturday barbecues and outdoor adventures year-round.

TRANSPORTATION

Embracing active transportation like nowhere else, our region has invested significantly in cycling paths, parks, and shelters, complemented by our dependable weather. Public transport and strategic traffic network upgrades are reflecting our burgeoning population's demands.

NATIONAL AND GLOBAL CONNECTIONS

Nelson Airport has growth projections extending into 2035, cementing its status as New Zealand's busiest provincial airport. Port Nelson stands as the maritime gateway and vital centre for our region's economic activity and growth. The Port offers a comprehensive suite of services, including marine operations, cargo handling, warehousing, logistics, slipway services, and an extensive property portfolio.

EXCELLENT EDUCATION

The region boasts excellent schools that deliver quality education. With over 80 early childhood education options and numerous primary and secondary schools, we prioritize nurturing young minds. The Nelson Marlborough Institute of Technology/Te Pūkenga offers aquaculture programs at Certificate, Bachelor, and Postgraduate levels, designed in close collaboration with industry for seamless workforce integration. The International Maritime Institute of New Zealand offers a wide range of maritime licenses and short courses aligned with global seafarer standards.

DIVERSITY ABOUNDS

Our diverse population of approximately 113,000 individuals blend urban offerings with a strong sense of community. Embracing a rich tapestry of cultures, with one in five residents hailing from overseas and 48 different cultural groups residing here, diversity thrives. The region buzzes with over 1,500 sports, arts, and cultural events annually, ensuring there's something for everyone. The fortunes of our blue economy are intertwined with the well-being of our coastal communities, where marine-related industries serve as major employers and supporters of community initiatives.

HOUSING FOR ALL

As our population grows, we're actively creating space for more residences and businesses. Developments are underway to encourage more central city living. There are housing options catering to every budget. From central city rentals to hilltop hideaways, from contemporary suburban subdivisions to exciting new apartment complexes, the region offers a myriad of choices.

HEALTHCARE EXCELLENCE

Our residents benefit from comprehensive healthcare services. The government's commitment to a \$1 billion redevelopment of Nelson Hospital, scheduled for completion by 2030, ensures a fit-for-purpose, future-proof healthcare facility.

EMBRACE THE GREAT OUTDOORS

Our breath-taking natural landscapes captivate visitors from across the globe. Nestled between Golden and Tasman Bay, our region benefits from around 350 mountain bike trails, 250 hiking paths, and access to three National Parks – Kahurangi, Nelson Lakes, and Abel Tasman – where lakes, mountains, and pristine beaches beckon. It's a sprawling natural wonderland, impossible to resist. People of all ages and fitness levels can savour the outdoors, exemplified by Tasman's Great Taste Cycle Trail.

Nelson Tasman invites you to embrace a life where the extraordinary is an everyday occurrence, and opportunities abound in every direction.

World-class assets and cutting-edge facilities

Our scientific expertise and regional priorities ensure our blue economy facilities can stand shoulder-to-shoulder with the world's best. Hear from some of our leading organisations:

CAWTHRON INSTITUTE

The ocean is our lifeblood – our challenge is to enable the utilisation of its valuable resources to improve livelihoods while ensuring the health of this important ecosystem.

Cawthron Institute's core research capabilities span aquaculture, aquatic animal health and biosecurity, algae research, food safety, data science, blue tech and environmental monitoring to enable a thriving blue economy.

In addition to Cawthron's work with industry partners and communities to identify economic opportunities, environmental impacts and societal advances, our researchers at our world-class facilities, including Cawthron Aquaculture Park and our PC2 Level Aquatic Research Laboratory, deliver insights into:

- Aquaculture research into the physiology and biology of important species like salmon, shellfish and seaweed, the optimisation of breeding, hatchery and farming practices and the development of new technologies.
- Seafood safety research that maintains access to global export markets and keeps consumers safe.
- Aquatic Animal Health and biosecurity research into invasive species and pathogens.
- Remote environmental monitoring solutions that provide real-time data on changes in the marine environment.
- Data science and modelling capability that enhances our understanding of oceanographic conditions.

SEAFOOD RESEARCH UNIT PLANT & FOOD RESEARCH

Plant & Food Research is one of Aotearoa New Zealand's Crown Research Institutes and provides research and development that adds value to Aotearoa's horticulture and seafood industries. The Nelson Research Centre, one of Plant & Food Research's 14 sites, was opened in conjunction with Port Nelson in 2017 and houses 50 staff focused on seafood research, along with laboratories, workshops, offices, an extensive live finfish facility and the most recent investment, a 15m flume tank for prototype testing. Close to the Research Centre, Plant & Food Research also has a pilot plant, where scientists are developing new commercially scalable processes for extraction of marine molecules.

The Seafood Technologies portfolio covers a wide range of research and technology development relating to the use of Aotearoa's precious seafood resources. This passionate group of researchers works on everything from capture and production technologies and targeted breeding of fish species, through to optimising the use of marine biomass and ensuring food safety.

PORT NELSON

PORT NELSON

Port Nelson is the maritime gateway for Te Taihū – a vital hub for economic activity and a key stakeholder in our region’s continued growth and prosperity. The Port offers a comprehensive range of services, including marine operations, cargo handling, warehousing, logistics, slipway services, and an extensive property portfolio. Annually, the port handles approximately 3.3 million tonnes of cargo, which includes around 120,000 twenty-foot equivalent containers (TEU). The cargo volume breakdown comprises approximately 67% exports and 33% imports. Key export commodities include forestry products (logs, sawn timber, and processed timber), seafood, pip fruit, and wine. Notably, Port Nelson plays a vital role in the wine industry’s supply chain, as 70% of New Zealand’s wine is produced in the Marlborough region. On the import side, major commodities include fuel, vehicles, cement, and methanol.

NELSON AIRPORT

Nelson Airport welcomes more than 900,000 travellers annually through its light, modern and sustainable terminal building. The airport is a strategic gateway enabling air travel, connectivity and freight transport for more than 120,000 residents in the Nelson–Tasman region. We serve four airlines, including our national carrier Air New Zealand, Originair, Sounds Air and Golden Bay Air. The airlines provide direct links to the key cities of Auckland, Wellington and Christchurch, as well as direct provincial links to the North Island cities of Palmerston North, Kapiti Coast and short hops to “local” destinations Tākaka and Karamea in the upper South Island. Nelson Airport’s vision is “to be a world-class airport where zero emissions aircraft operate” and is an active participant in the aviation sector’s work towards a zero-emissions future.

NMIT TE PŪKENGĀ

At NMIT |Te Pūkenga, we are at the heart of sustainable aquaculture and marine conservation. The Nelson region is a hub of innovative research and production and our ākonga (students) get to be at the centre of it all.

Taught by experts in their respective fields, learners can breed, raise, and harvest fish and shellfish, study seaweed in our new purpose-built algae lab at the Cawthron Institute, receive real-world experience with an average of one field trip per week and even go global with their research projects.

Many of our tutors are published researchers and are passionate about teaching world-class content and cutting-edge techniques.

As we focus on getting our learners industry ready by connecting them with the right people, ākonga focus on how to apply what they learn to address some of the major issues facing our planet.

Charting an exciting future

Nelson Tasman stands on the threshold of a bold, strategic transformation, marked by substantial investments in infrastructure that will pave the way for our future growth.

PORT NELSON'S INFRASTRUCTURE PROPERTY MASTERPLAN

Port Nelson is embarking on a transformative journey through its Infrastructure/Property Masterplan, an ambitious blueprint that envisions the port's infrastructure, asset, and property requirements up to 2050. This phased development program will not only bolster the port's capacity to meet the evolving import and export needs of Te Taihu but also create a thriving ecosystem of businesses that rely on proximity to the port.

MARINA MASTERPLAN

The Marina Masterplan is set to create an unbreakable bond between the city and the marina precinct, harmonizing with Nelson's visionary urban development plans. It aligns with Te Ara o Whakatu - Nelson City Centre Spatial Plan, Council's City to Sea Linkage, and the Nelson Future Access Project. With the need to address environmental and climate change challenges at its core, this masterplan is poised to foster eco-friendly practices in both the construction and daily operations of the Marina.

ENVIRONMENTAL INVESTMENT

Te Taihu is a haven of environmental diversity, sheltering unique natural communities and rare species that face threats elsewhere in New Zealand. Our region has emerged as a force to be reckoned with in terms of investment and innovation in conservation and biodiversity restoration. Visionary leaders are helping unlock philanthropic investments in conservation, underpinned by a deeply collaborative ecosystem driven by the Kotahitanga mo te Taiao Alliance.

URBAN REGENERATION

Urban settlements are undergoing a revitalisation, driven by a desire to enhance liveability, vibrancy, and resilience in the face of congestion, climate change, and evolving retail trends. The Nelson City Council's investments in projects like the Bridge Street development, an active transport corridor and linear park, are set to infuse the city centre with lush green spaces.

NELSON AIRPORT'S VISION

The Nelson Airport 2050 Masterplan is a guide to optimizing airport land use while ensuring flexibility, efficiency, and safety. It reflects the community's aspirations for Nelson Tasman to remain well-connected and future-ready.

Nelson Tasman business support and collaboration

NELSON REGIONAL DEVELOPMENT AGENCY

Nelson Regional Development Agency's mission is to unlock the economic potential of Nelson Tasman to enable our people and places to thrive.

We do this by leading inclusive and regenerative economic development, supporting our businesses and people to grow, and shaping and amplifying our profile to attract people, business, and investment to the region.

Whether you're looking to invest, move, or start a business in Nelson Tasman, we have the data and case studies you need to make informed decisions. The team at the Nelson Regional Development Agency are here to support you through your relocation or investment decision. Whether you want more info, or are ready to take the plunge, we can connect you with business experts and key services, provide information to aid in your decision-making, and organise familiarisation visits. If you need to know how various sectors are faring to make business decisions based on facts and concrete data we can provide that too.

NRDA is home to the **Regional Business Partner Network** for Te Taihū. This business support service provides information, advice, funding and connections to support local businesses in their start-up, growth and innovation journey. We can support businesses who have ambitions to improve management capability, investment into R&D and/or wider innovation activities, including the blue economy.

MOANANUI

Moananui is New Zealand's first blue economy cluster, headquartered in the heart of Nelson. We bring together bold, forward-thinking organisations, driven by a collective mission to elevate New Zealand into a global leader for blue economy products, services, technology, research, and capabilities. In Te Taihū, we proudly house the largest and fastest growing blue economy in New Zealand, where Moananui assumes a pivotal role in catalysing collaborations that accelerate growth.

MAHITAHI COLAB

A partnership between Nelson Regional Development Agency, Nelson Tasman Chamber of Commerce and NMIT Te Pūkenga, the Mahitahi Colab is a physical collaboration hub based on NMIT's Nelson campus designed to support and inspire clever businesses, innovation and talent in Nelson Tasman.

NELSON TASMAN CHAMBER OF COMMERCE

NTCC is the independent voice of business that offers a complete toolkit of business development, networking and training to unlock business vitality.

Our connected commercial ecosystem provides support for businesses in the region. This includes linking to national agencies, such as New Zealand Trade and Enterprise, which have a regional presence.

In good company

Doing business in Nelson Tasman means you'll be surrounded by good company

SEALORD

Sealord is a leading global seafood company based in Nelson, New Zealand, that is dedicated to sustainable fishing practices and providing high-quality seafood to consumers across the globe. Sealord focuses on delivering excellence in every aspect of our operations.

At Sealord, we believe in doing right by the environment and our community. We understand the importance of preserving our oceans and ensuring the longevity of marine resources. We are a diverse and dedicated group of people who are passionate about the seafood industry and always welcome more people that share our values. Whether you are interested in exploring career opportunities at Sealord or learning more about our delicious products, we invite you to join us on this exciting journey.

MacLab

MACLAB AND PHARMALINK

MacLab and Pharmalink Extracts are partners in the sustainable marine natural products industry. They produce valuable nutraceutical marine oils used in the consumer products Lyprinol® and Antinol®, which are distributed globally. MacLab farms green-lipped mussels on sites located in the top of the South Island extending from Golden Bay to Port Underwood. The mussels are processed into powder using high pressure processing and freeze drying techniques. Pharmalink then extracts this powder to produce high value natural product oils using advanced CO2 extraction methods.

Both companies are committed to their local community, employing over 130 people and promoting environmental responsibility. MacLab has earned A+ NZ Sustainable Aquaculture certification and participates in environmental initiatives. Pharmalink specializes in CO2 extraction for health products and offers support for organisations entering the natural health product market.

Together, MacLab and Pharmalink are focused on driving innovation and collaborating with partners to advance the blue economy, leveraging their skills, resources, and technology for growth.

NEWFISH®

NEWFISH

Founded in 2020, New Zealand-based startup NewFish® utilizes microalgae technology to create highly nutritious, non-GMO, protein-packed nutrition and specialised food ingredients. Microalgae require a fraction of the water, land, and time as other protein sources and emit a fraction of greenhouse gases. NewFish's products have a complete amino acid profile, offering protein and nutritional ingredient solutions for sports and active lifestyles. This way, the solution enables the sustainable use of ocean and water resources for economic growth while maintaining a circular ecosystem.

NewFish® is proud of its partnership with New Zealand's Cawthron Institute and Moananui in Nelson, as well as receiving support from the Ministry for Primary Industries' Sustainable Food & Fibre Futures fund, as the parties search for native microalgae strains and optimise their growth conditions fit for human nutrition.

OCEANLAW

All those involved in the aquaculture and fishing industries know the complexity of the issues and problems that must be faced to run a successful operation. Perfectly positioned to meet the needs of today's blue economy, Oceanlaw New Zealand is a specialist legal service, ready to provide effective solutions to legal issues faced by those in the fishing, aquaculture industries and maritime right around the country. Oceanlaw's expert approach is driven by the vast experience of the team members.

Everyone knows that an ounce of prevention is the best approach and Oceanlaw can help with that, but even if that ship has sailed and a serious problem looms on the horizon, Oceanlaw's experienced crisis management and litigation team are there to support you. Whatever your legal needs in connection with the blue economy, Oceanlaw can help.

AQNZ

Aquaculture New Zealand serves as the organisation representing the New Zealand aquaculture industry, based in Nelson. We take great pride in promoting the interests of our marine farmers and advocating for their welfare. New Zealand's aquaculture industry is renowned worldwide for its exceptional seafood offerings, which are exported to over 80 countries worldwide. With an impressive yearly revenue of over \$650 million, our industry plays a key role in boosting the national economy.

The Top of the South is an important growing area for our industry, generating employment opportunities throughout the region. Our commitment to sustainability is unwavering, as we produce some of the most environmentally friendly and top-quality aquaculture products globally. These include the esteemed Greenshell™ mussels, King salmon, and Pacific oysters. Our dedication to excellence ensures that consumers can enjoy our products with confidence, while also contributing to the preservation of our pristine marine ecosystems.

In good company

KERNOHAN ENGINEERING

KernoHan Engineering takes pride in its five-decade-long commitment to supporting Nelson's business community. We have cultivated enduring partnerships with local enterprises, focusing on the design, construction, maintenance, and engineering upkeep of essential industrial machinery and equipment. At the core of our mission is the resolve to address vital challenges and deliver effective problem-solving solutions.

KernoHan Engineering offers a comprehensive range of engineering services, including:

- 1. Customized Design:** Our specialty is crafting tailored solutions to meet your unique business needs.
- 2. Cutting-Edge Technology:** We leverage state-of-the-art 3D scanning, modeling, and printing for precision and innovation.
- 3. Prototyping Expertise:** We excel in transforming abstract concepts into tangible prototypes.
- 4. Precision Machining:** Our CNC milling and profile cutting services ensure precision for intricate components.
- 5. Craftsmanship:** KernoHan's fitting and turning services showcase our dedication to precision engineering.
- 6. Specialised Welding:** We are proficient in specialised pipe welding for diverse applications.
- 7. Metal Fabrication:** We construct robust metal structures to your specifications.
- 8. Manufacturing Scaling:** Assisting in the seamless expansion of your production capabilities.
- 9. Engineering Maintenance:** Comprehensive maintenance services to ensure the longevity and optimal performance of your critical equipment.

As a founding partner of Moananui, KernoHan Engineering actively participates in community development, contributing to the region's economic vitality. Our enduring partnership with the Chamber of Commerce underscores our role in shaping and fortifying the area's development. Additionally, KernoHan continues to play a pivotal part in the Engineering Trades Apprenticeship Program, nurturing the next generation of skilled professionals.

Safety is paramount in our operations, ingrained in our corporate culture. We take pride in our ISO 9001 certification, reflecting our commitment to delivering consistently high-quality standards. KernoHan Engineering also holds certification as a climate-positive enterprise, signifying our dedication to environmentally responsible business practices.

One of KernoHan Engineering's unique strengths lies in our ability to bridge scientific innovation with practical engineering solutions. This positioning allows us to work seamlessly with emerging start-up ventures within the blue economy sector, transforming visionary ideas into tangible realities.

In conclusion, KernoHan Engineering embodies professionalism and community engagement, grounded in our unwavering commitment to safety, quality and sustainability. Our diverse service portfolio and dedication to innovation position us as the preferred partner for businesses within our region.

TRINDER

TRINDER

If your business is the blue economy and you are looking for engineering support to create design solutions in the form of machinery, products or structures – then Trinder Engineering are your ideal professional partner.

With over 60 years of experience and commensurate knowledge in developing solutions for the primary sector, Trinders has unfettered access to wide ranging technologists, engineers, certifiers, researchers and funders. Friendly professional staff will work with your organisation to create an effective and efficient team, generating optimal design solutions to meet your specific commercial and financial needs.

Achieve your business goals with support from Trinders, a Nelson based family operated company, dedicated to research, design and manufacturing – developing and/or commercialising bespoke mechanical and mechatronic solutions for you.

BECA

BECA

New Zealand's blue economy is fast growing and dynamic. With investment and support from industry, Iwi, and government, there is a focus on expanding export potential to bring New Zealand products and services to the global stage.

Building a partnership with a professional services and engineering firm that understands your business can be a key success factor in achieving your goals. With a long-established footprint in blue economy industries across the Asia Pacific, Beca helps businesses achieve success at all stages of your operations.

We offer an integrated service that spans your project from research and development and raw material to packaged product, encompassing feasibility studies, planning, design, and operation. We have specialists in processing, packaging, refrigeration, energy systems, automation, environmental management, civil and structural and project management.

We're partnering with industry, to identify sustainability opportunities, translate frameworks and targets into design requirements and provide analysis to de-risk innovative solutions whilst considering careful management of resources.

And as we move towards a lower carbon future, Beca's Decarbonisation Planning specialists can develop a practical roadmap to help your business decarbonise its operations – leading to a lower carbon, more resilient future.

Together we are unlocking
the economic potential of
Nelson Tasman's blue economy.
